Anti-Slip Domestic

Safety Treatment for Ceramic Tile, Quarry Tile, Terrazzo and unpainted concrete

Description	<ul style="list-style-type: none"> Anti Slip Domestic is a fluoride based liquid safety treatment designed to control slipping on tiled and concrete floors - particularly when water is present.
Why Domestic	<ul style="list-style-type: none"> Anti Slip "commercial formulation" has been used industrially for almost 10 years, and whilst household applications are obvious, the cost factor has been high. To overcome this factor the D.I.Y. domestic product has been developed to provide an economical solution.
How does it work	<ul style="list-style-type: none"> Anti Slip Domestic creates a minute change in the surface texture of the floor with little or no change in appearance but providing an improvement in slip-resistance of up to 70%
How long does it last	<ul style="list-style-type: none"> The floor surface will have to be worn down to affect the Anti Slip Treatment. It is not a coating which will peel off.
Instructions for Use	
Surface Preparation	<ul style="list-style-type: none"> Make sure substrate is clean prior to treatment, mop floor with water to pre- wet surface prior to treatment
Application	<ul style="list-style-type: none"> Anti Slip is poured undiluted into a bucket or pail and applied by mop, broom, brush, or squeegee directly onto the floor in three equal applications. Allow a few minutes between applications. <u>Do not allow the surface to dry.</u> After the final application thoroughly rinse the surface with water. Mop or squeegee dry if required. The cleaning effect will be obvious. The floor can be walked on immediately.
Cleaning	<ul style="list-style-type: none"> Clean all tools with warm soapy water
How safe is Anti-Slip	<ul style="list-style-type: none"> Anti Slip is environmentally friendly. Those with sensitive skin should wear gloves, however no other safety precautions are required.

Where can I use Anti-Slip

- Anti Slip can be used in a range of locations around the house where there is concern for slip/fall accidents. Typical applications include pool surrounds, patios, bathrooms, laundries, steps, kitchens, and entry foyers. The product may be used internally or externally and is not affected by ultraviolet rays.

Which Floors can be treated with Anti-slip

- Anti Slip is designed for use on ceramic tiles, including glazed and mosaic tiles, quarry tiles, terrazzo, and unpainted or unsealed concrete.
- All surfaces to be treated must be tested on a small inconspicuous area to check for reaction with product or unwanted change in appearance
- [Do not use on Porcelain Tiles.](#)

Important Notification

All orders are accepted subject of our terms and conditions at time of purchase. Customers should always refer to the most recent issue of the Technical Data Sheet for Anti-Slip, copies of which will be provided on request. The information, and, in particular, the recommendations relating to the application and use of Anti-Slip, are given in good faith based on Viroseal's current knowledge and experience of the product when properly stored, handled and applied under normal conditions. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The proprietary rights of third parties must be observed.
